

10/09/2013: Press Release
 Academic year 2013

14 new researchers from top universities worldwide move to Toulouse in September!

The new batch of researchers who will further enrich the reputation of TSE (Toulouse School of Economics) and IAST (Institute of Advanced Studies in Toulouse) have arrived this fall 2013 in Toulouse. Once again, the recruitment campaign was rich and diverse: 14 researchers from 14 various prestigious universities, representing 8 nationalities and covering 9 disciplines. Concerning the junior chairs, the recruitment committee received over 400 applications resulting to 5 recruitments.

These researchers will discover the charm of the Pink City while conducting their research in one of the best economic research centers in the world (in the Top 10 ranking REPEC).

The attractiveness of TSE and IAST is not only based on the scientific excellence but also on the policy of course discharges to allow them to concentrate on their research and also on a series of services implemented to facilitate the installation of researchers and their family.

Recrutements TSE

CHAIRES JUNIOR
