

The Toulouse Economics and Biology Workshop

May 23-24, 2013

Just as physics provides a foundation for chemistry, and chemistry for medicine, biology is the natural foundation for any science that seeks to understand the behavior of living beings. Recent years have witnessed a surge in empirical and theoretical research that establishes connections between economics and biology. We are proud to present several of the key contributors to this research at a workshop, to be held in Toulouse, France:

Ted Bergstrom (Economics, UC Santa Barbara)

Isabelle Brocas (Economics, University of Southern California)

Colin Camerer (Economics, California Institute of Technology)

Jean Clobert (Biology, Station d'Ecologie Experimentale du CNRS, Moulis)

Étienne Danchin (Biology, Université Paul Sabatier, Toulouse)

Lena Edlund (Economics, Columbia University)

Ernst Fehr (Economics, University of Zürich)

Alan Grafen (Biology, Oxford University)

Hanna Kokko (Biology, Australian National University)

Arthur Robson (Economics, Simon Fraser University)

François Rousset (Biology, Institut des Sciences de l'Evolution - Montpellier)

Peyton Young (Economics, Oxford University)

Poster session for post-docs and Ph.D. students:

Besides the plenary sessions, there will be a poster session for post-docs and Ph.D. students. A limited number of travel grants will be available. Submissions (abstract + C.V.) should be sent to econbio_poster@iast.fr no later than February 28, 2013. When submitting, please specify whether you are applying for a travel grant.

Attending the workshop:

The sessions will be open to the public. Those who wish to attend are invited to register by writing to econbio@iast.fr.

Organizers:

Ingela Alger — TSE (CNRS, LERNA), and Institute for Advanced Study in Toulouse

Jörgen Weibull — Stockholm School of Economics, and Institute for Advanced Study in Toulouse
