

TSE Executive Education

January 20 - 24, 2020

Toulouse School of Economics

Regular course:

The Law and Economics of Damages in Competition Cases

Objectives:

Those attending this course will learn how to quantify damages in competition cases in theory and practice. Participants will review recent cases and take part in a mock case where they will be able to apply the notions learned in a true adversarial context.

Key benefits:

- Learn about calculating cartel overcharges, pass on rates and interest payments using rigorous economic methods
- Apply these notions in hypothetical scenarios designed to mirror actual cases
- Learn how to distinguish between robust economic assessments and models aimed to inflate or deflate damages estimates misleadingly

TSE Executive Education

Regular course: The Law and Economics of Damages in Competition Cases

Program: January 20 - 24, 2020
