RESEARCH

MORAL HAZARD IN PREVENTION AND TREATMENT

Presented in 15th Journée Maurice Marchand, Nov 18th 2016 | Paris, FR

Accepted for presentation: 12th World Congress of the International Health
Economics Association, July 2017 | Boston, USA

And 16th Journées Louis-André Gérard-Varet-International Conference
in Public Economics, June 2017 | Aix-en-Provence, FR

This paper investigates the preventive and treatment decisions of people with
reference dependent preferences. It also examines the effect of a compulsory social
health insurance on the optimal choice of preventive efforts and medical demand.
Optimal insurance design and policy recommendations are also studied.

PATIENT MOBILITY UNDER DIFFERENT HEALTH CARE SYSTEMS WITH DR. CATARINA GOULÃO

This paper studies the impact of patient mobility on the interaction of
different health care systems, and on the welfare of the relevant regions. We
first explore equilibrium price and waiting time if patient mobility is allowed,
and then we would like to investigate the long run effect of patient mobility
on the evolution of health care systems during the progress of European
Integration. We also give our policy recommendations to the future
regulations of health care systems in EU.
