

At the heart of economics

**“We owe our reputation
to teamwork”**

Jean TIROLE

TSE Chairman
2014 Nobel laureate

Jean-Jacques LAFFONT
Founding father of TSE

RESEARCH

TSE is one of the world's top 10 economics departments, gathering more than 150 international faculty among whom Jean Tirole, 2014 Nobel laureate.

EDUCATION

TSE has been training tomorrow's top economists since 2011. Its 2500 students benefit from the academic excellence of TSE faculty but also from the inputs and advice of international experts. The growing alumni network is another key advantage for their careers.

PARTNERSHIPS

Jean-Jacques Laffont, TSE's founding father, always envisioned a strong link between academic research, institutions, companies and the real-world issues they face. Toulouse economists have hence been very active exchanging and debating with practitioners and institutional leaders, allowing our faculty to test their models and results on empirical situations.

INTERDISCIPLINARY

The Institute for Advanced Study in Toulouse (IAST) is a cutting-edge research center hosted by TSE.

Interdisciplinarity is at the heart of IAST which was built with the idea that combining different methods, techniques and views from the different social sciences can unlock new solutions to today's big issues.

**“TSE’s mission
is to develop economic
knowledge for a better world”**

Christian GOLLIER

TSE Director

A LEADING RESEARCH CENTER

4

NOBEL LAUREATES ON
THE SCIENTIFIC COUNCIL

150

FACULTY MEMBERS

Toulouse School of Economics

Is an international research center among the very best in the world. TSE is for example the 3rd beneficiary of European Research Council grants. This support, awarded via calls for projects, illustrates the talent and academic excellence of TSE faculty.

Imagined by Jean-Jacques Laffont in the 80s, TSE has always been inspired by the very best universities in the world and implemented from the outset a strong independent governance system, ensuring the long-term vision of the center and its ambition to figure among the very best research institutions in the world. TSE's Scientific Council gathers 16 world-class academic members among whom 4 are Nobel laureates.

TSE faculty are always in relation with economic leaders from companies or institutions and are regularly asked to deliver reports or analysis. This mission of contributing to public debate is at the heart of the institute.

**“TSE implements innovative
teaching techniques, in line
with the very best international
standards”**

Stéphane GREGOIR

TSE Dean

Toulouse School of Economics

trains tomorrow's leading economists and offers both theoretical and empirical courses, directly in link with the latest research results from its faculty.

TSE implements cutting-edge teaching techniques and offers its students many career options and opportunities via internships, international exchanges, a Junior company, campus associations, and much more.

Proudly international, TSE is a unique center in France both in terms of academic excellence and ambitious education programs, one of the very best institutions in these two fields.

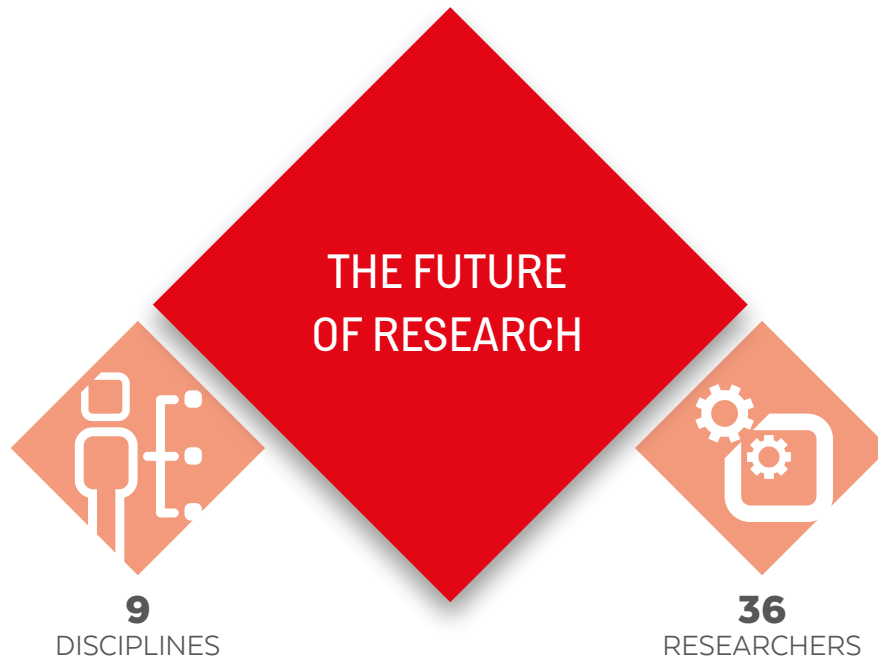

**“The study of human
behavior is the common goal
of the different social sciences,
it’s high time to remove their
artificial boundaries”**

Paul SEABRIGHT

IAST Director

The Institute for Advanced Study in Toulouse

gathers more than thirty international researchers from the different social sciences (anthropology, biology, law, economics, history, philosophy, political science, sociology) within a cutting-edge interdisciplinary research center that aims to answer the biggest societal questions.

Innovation is at the heart of IAST and its' members have implemented many new ideas to allow better academic exchanges between the disciplines.

IAST hosts both many internal seminars to develop the junior faculty's thought processes and regularly welcomes top international academics to cross-discipline conferences.

**“An incredible opportunity
to directly confront our work with
the real-world issues of companies
and institutions”**

Sébastien POUGET

TSE Partnership Director

ECONOMETRIC
REVIEWS

Toulouse School of Economics

has always been a partnership-oriented research center. Over the years, its numerous partners have benefitted from the economic expertise of TSE faculty in a wide range of fields, most notably industrial organisation but also much more.

These exchanges have also been of great help to TSE faculty who have been able to test their theories, models, and predictions. The work that the Nobel Committee rewarded Jean Tirole for in 2014 stems from this tradition of partnership research.
