

Program 2021/2022

AIMS AND SCOPE

The master aims at providing econometric and empirical analysis tools combined with strong skills in using large data sets to perform deep studies in a broad area of economics.

The EEE M2 program provides in the first semester a solid training in microeconometrics, time series, panel data models, non-parametric methods, large dimension statistical tools, computer programming, and database management system. In the second semester, students apply these training to do empirical studies in industrial organization, finance, public policy evaluation programs, health and insurance, data analytics and big data.

Courses are taught in English by TSE faculty members with well-established international reputation in econometrics, empirical economics, industrial organization, and finance among others. This training is completed with an empirical project done during the whole year in a group of students.

Note: students can apply to either to the full program (i.e. two years) or directly to the 2nd year (refer to the Admission section for further information)

STRENGTHS OF THE PROGRAM

- TSE boasts an internationally renowned research group in econometrics and empirical economics.
- Almost all classes in the program are oriented towards empirical analysis.
- Students develop empirical skills to perform economic analysis in many fields.
- Computer programming and database management system are key elements of the training.
- The empirical project done during the year in group allows the student to implement all the acquired tools.
- The program benefits from TSE affiliated research centers' strong ties with a network of large French and foreign firms (EDF, Orange, La Poste, Microsoft,...), banks (Société Générale, BNP Paribas,...) and insurance companies (AXA, SCOR,...) that provides students with a valuable window of job opportunities.

COURSES

1. Master in Econometrics and Empirical Economics – 1st Year

SEMESTER 1	SEMESTER 2
<p>Compulsory:</p> <ul style="list-style-type: none"> • Game Theory * • Theory of Incentives * • Macroeconomics * • Intermediate Econometrics * • Applied Econometrics * • R programming * • Professional Development • French as a Foreign Language <p>2 electives:</p> <ul style="list-style-type: none"> • Environmental economics • Economic History • Evolution of economic behaviour • Understanding Real World Organizations • Markov Chains and applications**** • Probability Modeling • Project Management • Experimental economics • Political Economy • Market Power & Regulation 	<p>Compulsory:</p> <ul style="list-style-type: none"> • Public economics * • Applied Econometrics * • Program Evaluation * <p>4 electives:</p> <ul style="list-style-type: none"> • Advanced Macroeconomics ** • Advanced Microeconomics ** • Industrial Organization ** • Economics of Human Development • Environmental & Resource Economics ** • Time series ** • Panel Data ** • Corporate finance ** • Market finance ** • Empirical Industrial Organization • Topics in food economics • Behavioral and Experimental economics • Dynamic Optimization • Martingales theory and applications **** • Data Bases
<p>Optional courses</p> <ul style="list-style-type: none"> • Introduction to SAS (for newcomers in the first year of master) • Math camp for M1 and M2 (End of August): Algebra/Probability/Static Optimization refresher*** 	<ul style="list-style-type: none"> • Compulsory International internship or Master Thesis*

*A minimum exam score of 10 out of 20 is required

**Masters 2 Directors highly recommend to attend these options:

- Industrial Organization: M2 EMO
- Environmental & Resource Economics: M2 ERNA
- Economic of Human Development: M2 PPD
- Corporate finance et Market Finance: M2 Finance
- Panel Data or Time series: M2 EEE

*** Math refresher courses opened to M1 and M2 students

**** To attend the Martingales theory and applications course you need to have attended the Markov Chains course first

To obtain the Econometrics and Empirical Economics Master's degree, students need to complete all the courses of the first semester and the equivalent of four courses of 30 hours on the second semester, and either:

- do an internship within a firm (public or private), a financial institution (bank, insurance), a government institution (competition or regulatory authority), or a research laboratory, and write an internship report or
- Write a Master Thesis under the supervision of a TSE faculty.

2. Master in Econometrics and Empirical Economics – 2nd Year

SEMESTER 3	SEMESTER 4
<p>Compulsory courses:</p> <ul style="list-style-type: none"> • Econometric Methods for Empirical Economics • Panel Data • Nonparametric Econometric Methods • Machine learning for economics • Time Series and Economic Forecasting • Database Management System • Programming in Python • Datanomics: regulation of data spreading and data protection. 	<p>Compulsory courses:</p> <ul style="list-style-type: none"> • Empirical project <p>Choose 2 electives:</p> <ul style="list-style-type: none"> • Empirical Industrial Organization • Financial econometrics • Randomized control trials and policy evaluation
<p>Non-Mandatory:</p> <ul style="list-style-type: none"> • Professional Development ** • Algebra Refresher *** • Probability Refresher *** • Dynamic Optimization Refresher *** 	<p>Equivalent of 8 credits among:</p> <ul style="list-style-type: none"> • Data Analytics* (2) • Econometric Approach to Efficiency Analysis*(2) • Experimental Economics* (2) • Health Econometrics* (2) • High-dimensional models* • Empirical Industrial Organization* (4) • Financial econometrics* (4) • Randomized control trials and policy evaluation* (4) • Topics in Econometrics and Empirical Economics****
	Internship or Master Thesis

* 4 courses of 15h, or 1 course of 30h + 2 courses of 15h

** Students followed the course " Professional Development" in M1 in 2020-2021 will be exempted.

*** Upgrade course in Mathematics, open to students in M1 and M2 of TSE.

**** Subject to agreement with the directors of the master's program EEE and ETE.

ADMISSIONS

Admission is based on academic excellence.

First year admission :

- Aimed at English speakers
- Students should hold a BSc in Economics or Applied Mathematics within a recognized curriculum considered as consistent with the program and approved by the TSE selection committee.

Second year admission:

- Admission is based on academic excellence criteria.
- Applicants from the French system must have passed the TSE International track Master 1 (1st year Master's) in Economics or another French University master in Applied Mathematics or an equivalent degree (e.g., engineering school,...).
- For foreign degree holders, the required degrees are either a BSc, M.A., or MSc, within a recognized curriculum regarded as consistent with the program and approved by the TSE Selection Committee.
- Some brushing-up in Economics or Maths might be advisable in some cases. Working knowledge of English is obviously required.

APPLICATION DEADLINES

For the 1st year, students have to apply to the Master in Economics. For the 2nd year, students have to apply to the Master in Econometrics and Empirical Economics.

Applications are considered in November for Eiffel Scholarship applicants and in January for international students (and French degree holders for the masters 1st year application only) and in May for French University graduates.

For more details about requirement documents and application process, please see the [Admission section](#).
