Meeting by appointment or after class

Course's Objectives - Objectifs du cours :

This course shows how models in microeconomics, game theory, and industrial organization can be used to analyze real world economic problems and guide public policy.

Students learn how to develop and solve economic models to answer an economic question.

Students should understand the limits of the models and be able to give a critical assessment of the results.

Prerequisites - Pré requis :

Although the course will not use difficult mathematics, some familiarity with game theory will be helpful. Course will elaborate on microeconomics and refers a little bit to econometrics.

Grading system - Modalités d'évaluation :

One mid-term exam and one exam at the end of the semester

Session planning - Planification des séances :

1. Introduction – reminder on public goods and externalities
2. Environmental regulation
3. Introduction to contract theory
4. Introduction to transport economics
5. Two-sided markets
6. Competition economics
