

Ecology for Economists

Course title - Intitulé du cours	Ecology for Economists
Level / Semester - Niveau /semestre	M2 / S1
Teacher - Enseignant responsable	PENA SUAREZ JORGE
Other teacher(s) - Autre(s) enseignant(s)	
Other teacher(s) - Autre(s) enseignant(s)	
Other teacher(s) - Autre(s) enseignant(s)	
Other teacher(s) - Autre(s) enseignant(s)	
Other teacher(s) - Autre(s) enseignant(s)	
Lecture Hours - Volume Horaire CM	15
TA Hours - Volume horaire TD	
TP Hours - Volume horaire TP	
Course Language - Langue du cours	English
TA and/or TP Language - Langue des TD et/ou TP

Course's Objectives - Objectifs du cours :

Ecology is the scientific study of the interactions that determine the distribution and abundance of organisms. Evolution is the change in population over time and a fundamental principle of biology. As Theodosius Dobzhansky famously put it: "Nothing in biology makes sense, except in the light of evolution". This course is intensive introduction to some of the main theoretical concepts in ecology and evolution for students coming from an economics background. It will mainly focus on a brief overview of the main forces of evolution (mutation, natural selection, genetic drift, and migration) and of biotic interactions at the level of populations. The course will cover the following topics:

1. Ecology as a scientific field.
2. Genetic variation.
3. Mutation and genetic drift.
4. Natural selection and gene flow.
5. Population dynamics, density dependence, and intraspecific competition.
6. Species interactions: interspecific competition.

The concepts will be introduced by means of mathematical models and their importance will be illustrated with case studies. The main goal is for economists to be sufficiently acquainted with some of the main concepts (and jargon) used in evolutionary biology and ecology to be able to interact with biologists in an efficient way, and to follow more advanced courses of the Master program.

Prerequisites - Pré requis :

Differential calculus

Practical information about the sessions - Modalités pratiques de gestion du cours :

Grading system - Modalités d'évaluation :

Students will be asked to read and prepare a presentation of two scientific papers (25% of the grade each). There will also be a final exam (50% of the grade).
