

# Workshop on the Economics of Artificial Intelligence and Data

co-organized by the Joint Research Center  
of the European Commission and the TSE Digital Center

May 6-7, 2019, Brussels

## Call for papers

**Background and objective:** Artificial Intelligence (AI) technologies and big data are currently receiving a lot of attention from both policymakers and firms. In contrast, there is relatively little academic work by economists on these topics. This workshop aims at bringing together academics, policymakers and industry representatives to discuss economic issues related to AI and data. It will include two keynote lectures, policy-oriented panel discussions, and presentations of academic papers.

### Keynote speakers:

**Avi Goldfarb** (University of Toronto)

**Jacques Crémer** (Toulouse School of Economics).

**Submission:** We welcome submissions of papers on all economic aspects of artificial intelligence and data. However, we particularly encourage submissions of policy-oriented papers on the following topics:

- AI and competition
- AI, labor and inequality
- AI and privacy
- Algorithmic decision-making
- Data ownership and access
- Data, algorithms and discrimination
- Data and the Internet of Things
- Markets for information

[To submit your paper please click here](#)

Submission deadline: **February 15, 2019**

Decisions will be notified by March 8, 2019. We will cover accommodation expenses for speakers.

### Organizers:

**Nestor Duch-Brown** (European Commission)

**Yassine Lefouili** (Toulouse School of Economics)

### Workshop venue:

Berlaymont building, Rue de la Loi 200, 1049 Brussels, Belgium.
